 As part of the transitional provisions of the amended Native Title Act in 1998, all applications were taken to have been filed in the Federal Court. Any changes to these applications and the filing of new applications happen through the Federal Court. The Tribunal records information on these matters in the Schedule of Applications (Federal Court). The map depicts the boundaries of claimant applications (these can be external boundaries with areas excluded or discrete boundaries of areas being claimed) as they have been recognised by the Federal Court process. Where the boundary of an application has been amended in the Federal Court, the map shows this boundary rather than the boundary as per the Register of Native Title Claims (RNTC), if a registered application.  
 The applications shown on the map comprise:  
 - claimant and compensation applications,  
 - registered applications (i.e. those that have complied with the registration test),  
 - new and/or amended applications where the registration test is being applied,  
 - unregistered applications (i.e. those that have not been accepted for registration).  
 Determinations shown on the map include:  
 - registered determinations as per the National Native Title Register (NNTT),  
 - determinations where registration is conditional on other matters being finalised.  
 Currency is based on the information as held by the NNTT and may not reflect all decisions of the Federal Court.  
 To determine whether any areas fall within the external boundary of an application or determination, a search of the Tribunal's registers and databases is required. Further information is available from the Tribunal's website at [www.nntt.gov.au](http://www.nntt.gov.au) or by calling 1800 640 501
