

Notifications – Web Mapping Application

Quick Start Guide

Notification web mapping applications are available for mobile devices and complements the published notices which appear in newspapers.

Users will be able to:

- Access and visualise the area covered for any current public notice in relation to a native title claim or Indigenous Land Use Agreement (ILUA)
- Visually identify areas that may overlap their interests
- Upload their own or other available data to check for overlapping interests

Web mapping applications can be accessed:

- Individually by using a distinct URL published with the public notices
- By visiting the online notifications gallery containing all matters currently in notification.

The screenshot shows the 'National Native Title Tribunal' Notification Gallery. The header is dark blue with the title 'National Native Title Tribunal' in white. Below the header, it says 'GALLERY - Native title claims and ILUAs currently in notification'. There is a search bar labeled 'Search maps' with a magnifying glass icon. To the right of the search bar are icons for grid and list views. Below the search bar is a 'Sort by' menu with options: Date, Title (selected), Type, Ratings, Avg. Rating, Comments, and Views. The main content area displays two notification cards. The first card is for 'NC2017/001 Warrabinga-Wiradjuri #7', a 'Notice of an application for determination of native title' with 19 views. The second card is for 'NN2017/005 Darkinjung Local Aboriginal Land Council', also a 'Notice of an application for determination of native title' with 17 views. On the right side of the gallery, there is a sidebar with the heading 'Notification Gallery' and a description: 'Choose the notification of interest by selecting from the list contained in the gallery. This will open a Web Mapping Application which you can use to visualise the matter or matters being notified.' Below this is a 'Need help?' section with a link to the 'Quick Start Guide' and the email address 'geoservices@nntt.gov.au'.
