Data Reference and Source

External boundary description is based in part on spatial data sourced from the Department of Natural Resource and Mines (QLD) August 2012.

Cadastral data and Lot on Plan details sourced from Department of Natural Resource and Mines (QLD) August 2102.

River banks based where possible on Casement data sourced from Department of Natural Resource and Mines (QLD) August 2012 or Topographic vector data is © Commonwealth of Australia (Geoscience Australia) 2006.

75m and 105m Elevation Level in metres above sea level referenced to AHD (Australian Height Datum) derived from 5 m Digital Elevation Model sourced from Seqwater (QLD) September 2012.

On ground coordinates of EL 75m AHD and EL 105m AHD subject to survey.

Roads and road names based on Casement data sourced from Department of Natural Resource and Mines (QLD) August 2012.

Tracks as described through Forest Reserve and State Forest based on 100K raster topographic data sourced from Commonwealth of Australia (Geoscience Australia).

Reference Datum

Geographical coordinates are referenced to the Geocentric Datum of Australia 1994 (GDA94), in decimal degrees and are based on spatial reference data acquired from the various custodians at the time.

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome to the custodians of cadastral data continuously recalculating the geographic position of their data based on improved ground survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.
