

WAD23/2019 Palyku (WC1999/016) – Remaining application area

This description is an interpretation of the application area that remains undetermined following the determination of native title by the Federal Court of Australia on 10 March 2021 for part of WAD23/2019 Palyku and part of WAD483/2018 Palyku #2 (WCD2021/003).

External boundary description

The remaining application area covers all the land and waters within the external boundary described as:

Commencing at Longitude 120.052088° East, Latitude 21.848444° South, being a point on the northern boundary of Native Title Determination WAD23/2019 Palyku Part A (WCD2019/002) and the southern boundary of Native Title Determination Application WAD483/2018 Palyku #2 (WC2018/022) and extending south easterly along the southern boundary of that application boundary passing through Longitude 120.115199° East, Latitude 21.887249° South to Longitude 120.188863° East, Latitude 21.917777° South; then westerly to a north eastern corner of Native Title Determination WAD23/2019 Palyku Part A (WCD2019/002) at approximate Longitude 120.094763° and Latitude 21.916141° South and then westerly and north westerly along that determination boundary back to the commencement point.

For the avoidance of doubt the application excludes any land and waters already claimed by:

- Native Title Determination WAD23/2019 Palyku Part A (WCD2019/002) as determined by the Federal Court on 12 March 2019.
- Native Title Determination WAD23/2019, WAD483/2018 Palyku and Palyku #2 (WCD2021/003) as determined by the Federal Court on 10 March 2021.

Note

Data Reference and source

- Application boundary compiled by National Native Title Tribunal based on information or instructions provided by the applicants.
- Cadastre data sourced from Landgate (WA) August 2020.

Reference datum

Geographical coordinates have been provided by the NNTT Geospatial Services and are referenced to the Geocentric Datum of Australia 2020 (GDA2020), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time.

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome of the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.

Prepared by Geospatial Services, National Native Title Tribunal (23 March 2021).
