

Description of external boundary

PROPOSED SINGLE NOONGAR #2 NATIVE TITLE DETERMINATION APPLICATION

Area of Application (geographic extent) – 1,762 sq km

The application is as Native Title Determination Application WG6085/98 Harris Family (WC96/41) as registered 15th September 1999, being all the land, waters and seas above the Low Water Mark commencing on the north bank of the Capel River mouth where it meets the coast, then generally south easterly along the northern banks of that river to the northern boundary of the Bussell Highway road reserve; then generally south westerly along the northern boundaries of that road reserve to Longitude 115.418556° East; then south westerly to where the western boundary of the Bussell Highway road reserve meets the Caribunup River at Latitude 33.698833° South; then generally southerly along the western boundaries of that road reserve to the northern boundary of the Chapman Road road reserve at Latitude 34.216081° South; then generally westerly along the northern boundaries of that road reserve to a north west corner of the Chapman Road road reserve at Longitude 115.028597° East; then south westerly to a point on the coast at Latitude 34.222883° South and westerly to a point on the three (3) nautical mile coastal waters boundary at Latitude 34.221295° South; then generally northerly along the three (3) nautical mile boundary to Latitude 33.504292° South, then easterly to a point on the three (3) nautical mile coastal waters boundary at Latitude 33.506070° South, then generally south easterly and generally north easterly along three (3) nautical mile boundary to Latitude 33.510419° South; then easterly back to the commencement point.

Note

Reference Datum

Geographical coordinates have been provided by the NNTT Geospatial Unit and are referenced to the Geodetic Datum of Australia 1994 (GDA94), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time.

Reference Data and Source:

- Native Title Determination Application boundaries as referenced in the above description are as per the Schedule of Applications (Federal Court) as at 22nd August 2003.
- Application boundary data sourced from & used with the permission of Dept of Land Administration, WA. Attribution maintained by NNTT.
- “Low Water Mark”, in relation to tidal waters, means Lowest Astronomical Tide.
- Australian Maritime Boundaries Information System (AMBIS) data sourced from Geoscience Australia (2001).

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographic boundaries or the intersection with such, they are intended as a guide only. As an outcome to the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.

Prepared by the Geospatial Analysis & Mapping Branch, National Native Title Tribunal, 22nd August 2003.
