Reference Datum

Geographical coordinates have been provided by the NNTT Geospatial Unit and are referenced to the Australian Geodetic Datum 1984 (AGD84), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time.

Reference Data and Source:

- Non Freehold and casement data sourced from MapInfo Australia under licence from Department of Natural Resources & Mines, Qld (June 2003).
- RATSIB data compiled by NNTT based on reference material sourced from ATSIC and spatial data sourced from Geoscience Australia, Dept of Natural Resources & Mines (Qld) and Sinclair Knight Merz Pty Ltd.
- Local Government Area data sourced from Dept of Natural Resources & Mines, Qld (2002).
- 1:250,000 scale topographic image data is Crown Copyright and is used under licence from Geoscience Australia.

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographic boundaries or the intersection with such, they are intended as a guide only. As an outcome to the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.
