Data Reference and Source

 External boundary prepared by QSNTS, based in part on data sourced from the Commonwealth of Australia (NNTT) May 2019.

• That part of the northern boundary between the Lower Burnett River Sub-Basin Catchment boundary at Longitude 151.398377° East and a point on the southern bank of the Burnett River at Longitude 151.689791° East is based on Betsy's Country within Wakka Wakka People #4 external boundary description complied by the Commonwealth of Australia, NNTT (April 2019) on information or instructions provided by former Federal Court Justice John Mansfield and Kim McCaul. Topographic features in this part of the description sourced from QldMap Topo service, which is based on data acquired and collated by the Department of Natural Resources, Mines & Energy, Queensland for more than thirty years. This data is used primarily for the creation of the 1:25 000 Topographic Map Series covering various parts of Queensland.

 Cadastral data sourced from State of Queensland, Department of Natural Resources & Mines (February 2019).

Where available watercourse boundaries were derived from Cadastral data or 1:250K Topographic Vector
Data is © Commonwealth of Australia (Geoscience Australia) 2008.

 Catchment boundaries derived from The Basin Sub Area 100k (2009) dataset sourced from State of Queensland, Department of Natural Resources Mines & Energy January 2012).

• Local Government Boundaries (LGA) sourced State of Queensland, Department of Natural Resources Mines & Energy (February 2019).

Reference datum

Geographical coordinates are referenced to the Geocentric Datum of Australia 1994 (GDA94), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome of the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.
