

(August 2018).

- Lowest Astronomical Tide double Island Point to Caloundra Head based on Australian Maritime Boundaries (AMBIS) 2001, sourced from Commonwealth of Australia, Geoscience Australia
- Lowest Astronomical Tide Caloundra Head to Point Clontarf based in part on data sourced from State of Queensland, Maritime Safety, Department of Transport and Main Roads (September 2018)
- Local Government Authority boundaries sourced from State of Queensland, Department of Natural Resource, Mines and Energy (August 2018)
- Location of Mount Bauple taken from 1:100,000 scale Geoscience Australia Map Series.
- Oaky Creek (Edward Creek) alignment taken from Watercourse lines - North East Coast drainage division 1:25,000 dataset from State of Queensland, Department of Natural Resource, Mines and Energy (05 May 2015)
- Tracks in part as described through Forest Reserve and State Forest and Oaky Creek taken from 1:100,000 scale Geoscience Australia Map Series.
- Roads, Tracks, Rivers and Creeks where possible are based on cadastral data sourced from State of Queensland, Department of Natural Resources, Mines and Energy and Mines (September 2018). Elsewhere, rivers and creeks based 1:250,000 topographic vector data © Commonwealth of Australia (Geoscience Australia) 2008.
- Catchment boundaries based on Drainage Basins Queensland data sourced from State of Queensland, Department of Natural Resources, Mines and Energy (August 2010).

### **Reference datum**

Geographical coordinates are referenced to the Geocentric Datum of Australia 1994 (GDA94), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time.

### **Use of Coordinates**

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome to the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.

Prepared by Queensland South Native Title Services (25 September 2018).
