Dear NNTT

Our firm has received instructions to file two native title claims on behalf of the Bigambul People.

For the purposes of s 78 of the Native Title Act 1993 (Cth), we require the following assistance from the NNTT’s geospatial unit:-

- 1. A written description of the claim area for Bigambul #2 – see attached plan
- 2. A written description of the claim area for Bigambul #3 – see attached map.

Feel free to contact me should you require anything further or have any queries.

Kind regards

Ted Besley | Special Counsel

Bigambul People #2

External boundary description

The application area covers all the land and waters being Lot 135 as shown on DY1033.

Note

Data Reference and source

- Cadastre data sourced from Department of Resources, Qld (January 2022).

Reference datum

Geographical coordinates have been provided by the NNTT Geospatial Services and are referenced to the Geocentric Datum of Australia 2020 (GDA2020), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time.

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome of the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.

Reference datum

Geographical coordinates have been provided by the NNTT Geospatial Services and are referenced to the Geocentric Datum of Australia 2020 (GDA2020), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time.

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome of the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.
