

Schedule 3 – External Boundary

The area of land and waters:

Commencing at the south eastern corner of Lot 473 on SP206203 (Harkness), also being a corner point of Kowanyama People Part B Native Title Determination (QCD2012/016); then south easterly until the junction of Maddigans Creek and Lorraine Creek; then generally westerly along the southern bank of the main channel of Maddigans Creek until the intersection with the eastern boundary of Lot 13 on CTH3 (Koolatah) and the eastern boundary of the Kowanyama People Part B Native Title Determination (QCD2012/016); then north easterly along the eastern boundaries of that lot and determination until the southern bank of the Alice River; then generally westerly along the southern bank of Alice River until Longitude 142.677962° East; then north westerly and northerly until the south western corner of Lot 473 on SP206203 (Harkness Station), also being the southern boundary of Kowanyama People Part B Native Title Determination (QCD2012/016), passing through the following coordinate points:

Longitude ° East	Latitude ° South
142.617286	15.648138
142.444867	15.542447
142.415146	15.540445

then easterly along that lot and determination boundary until the point of commencement.

Data Reference and source

Cadastral data sourced from Department of Resources, Queensland (published 07/08/2023).

Watercourse Lines sourced from Department of Resources, Queensland (published 05/10/2022).

Mountain Ranges, Beaches and Sea Passages sourced from Department of Resources, Queensland (27/07/2023).

Local Government Areas sourced from Department of Resources, Queensland (published 23/11/2023).

Native Title Determinations and Representative Aboriginal and Torres Strait Islander Body boundaries sourced from the Commonwealth of Australia, National Native Title Tribunal (published 03/08/2023).

Reference datum

Geographical coordinates are referenced to the Geocentric Datum of Australia 1994 (GDA94), in decimal degrees.

Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome to the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.
