- Drainage Basin Sub Areas data sourced from Department of Resources, Qld (published 20/10/2022).
- Rivers / Creeks based on cadastral casement data, else Watercourse Lines topographic data sourced from Department of Resources, Qld (published 05/10/2022). As referenced above, one unnamed watercourse is based on Watercourse Lines topographic data sourced from 2006 Geoscience Australia Geodata Topo 250K.

### Reference datum

Geographical coordinates are referenced to the Geocentric Datum of Australia 2020 (GDA2020), in decimal degrees and are based on the spatial reference data acquired from the various custodians at the time.

### Use of Coordinates

Where coordinates are used within the description to represent cadastral or topographical boundaries or the intersection with such, they are intended as a guide only. As an outcome of

the custodians of cadastral and topographic data continuously recalculating the geographic position of their data based on improved survey and data maintenance procedures, it is not possible to accurately define such a position other than by detailed ground survey.
